Education

University of California San Diego (UCSD)

Expected June 2026

B.S. Cognitive Science, Specialization in Design and Interaction

San Diego, CA

Coursework: Interaction Design, UX Design, UX Research, Front-End Development, Human Computer Interaction

Organizations: Design for America at UCSD, ACM

Technical Skills

Design: Figma, Adobe Creative Suite, Wireframing, Prototyping, Design Systems

Development: HTML/CSS, JavaScript, React, Next.js, GitHub, Responsive Design

UX: UX Research, User Flows, Accessibility Design, Usability Testing, Information Architecture

Collaboration: Project Management, Team Collaboration, Design Iteration, Presentation Design

Experience

Web Designer

Jan 2026 – Present

Just in Time for Foster Youth

San Diego, CA

- **Redesigned nonprofit website experience** through UX research, audits, and accessibility-focused design improvements
- **Conducted A/B usability testing** that increased clarity ratings from 3.63 to 4.8 (+32%) overall
- **Improved navigation and sign-up flows** by simplifying information architecture and reducing interface clutter
- **Collaborated on implementation planning** and designer-developer handoff for future mobile-focused redesign updates

Project Manager

Sep 2025 – Present

Design for America

San Diego, CA

- **Managed 5-person Feeding America redesign team** across research, prototyping, presentation, and testing phases
- **Planned project timelines and deliverables** to keep weekly design milestones and stakeholder reviews on schedule
- **Oversaw usability testing sessions and synthesis** that helped improve navigation clarity and user confidence ratings
- **Directed collaboration across design disciplines** to streamline food assistance flows and reduce information overload

UX Designer

Jan 2026 – Present

ACM Design Team

San Diego, CA

- **Conducted 1-on-1 interviews with hearing aid users** to identify major gaps in personalization and app usability
- **Designed adaptive onboarding flows** that recommended Simple or Tech modes based on age and tech comfortability
- **Redesigned dashboard interactions** by simplifying audio controls, increasing touch targets, and reducing scrolling
- **Developed accessibility-focused support systems** including guided tutorials, troubleshooting, and chatbot assistance

Projects

Lumen Hearing Aid App | *Figma, UX Research, Interaction Design*

- **Designed accessible hearing aid companion app** for older adults across changing listening environments daily
- **Created customizable audio modes and support flows** to improve accessibility and reduce user frustration
- **Conducted UX research and competitive analysis** on hearing aid usability issues and navigation pain points

Localo Smart Home App | *Figma, UX Design*

- **Designed room-based smart home interface** for easier device management and faster everyday interactions
- **Improved navigation efficiency and usability** through grouped controls and simplified interaction patterns
- **Applied responsive layouts and design systems** across multiple connected smart home interfaces consistently

Smart Home Dashboard Redesign | *Figma, Interaction Design*

- **Redesigned dashboard navigation system** to improve room-based controls and overall smart home usability
- **Reduced search friction and interface clutter** through clearer grouping and information hierarchy decisions
- **Used auto layout and scalable design systems** in Figma for consistent interface organization throughout

UCSD Community App Make-a-thon | *Figma, Rapid Prototyping*

- **Designed student community app** during one-hour sprint focused on improving campus social connections
- **Created collaborative prototypes and user flows** centered around student interaction and engagement experiences
- **Developed rapid UX concepts under pressure** while collaborating closely with student design teammates

Personal Portfolio Website | *Next.js, React, GitHub Pages*

- **Built responsive portfolio website** to showcase UX projects and front-end development experience professionally
- **Developed dynamic project routes and layouts** using Next.js and React for clearer storytelling experiences
- **Deployed optimized production-ready website** using GitHub Pages workflows and responsive front-end practices

Leadership & Activities

Design for America IDEA Team at UCSD | *Leadership & UX Collaboration*

Sep 2025 – Present

- **Collaborated on Feeding America redesign** focused on accessibility and resource navigation
- **Contributed to project planning** through critiques, iterations, and workflow discussions
- **Supported user-centered decisions** through research synthesis and accessibility-focused feedback
